

AIR™ Sequencing-Grade Adapters

产品特点:

- Ideal for next-generation sequencing, miRNA cloning and miRNA sequencing
- Affordable alternative to adapters found in sequencing kits
- Phosphorothioate, adenylation, blocking groups and other modifications available
- For Illumina, 454 and SOLiD next-generation sequencing platforms

产品介绍:

Bioo Scientific's custom next-generation Sequencing-grade Adapters are advanced tools for ultra-high-throughput sequencing. Custom adaptors can be designed for use with SOLiD, 454 FLX, Illumina or any other next-generation sequencing platform.

- Adapter Bar Coding Services Available
- Supplier for Core Sequencing Facilities
- Adapter Library Indexing Service Available

Bioo Scientific's AIR™ Sequencing-Grade Adapters are ideal for use in:

Genomic DNA Sequencing Oligo

Multiplexing DNA Sequencing Oligo

Paired-End Sequencing Oligo

DpnII and NIAIII Gene Expression

Small RNA Oligo Sequencing

Validated on the Illumina Solexa GAII sequencing platform

To request a quote for AIR™ Sequencing-Grade Adapters email us your desired sequence and the quantity of adapter you need along with any modifications you want to info@sbsbio.com
